

Creative Technologist & Digital Artist

PROFESSIONAL SUMMARY

Transdisciplinary digital artist and XR developer bridging the gap between physical materiality and virtual environments. Leveraging a strong foundation in classical oil painting and a master's background in Interactive Media, I specialize in creating immersive, sensory-rich Mixed Reality experiences and interactive installations. Proficient in creative coding and emerging technologies, I am passionate about exploring the intersection of human senses, critical data, and interactive art to rethink digital experiences.

CORE COMPETENCIES & SKILLS

- **Creative Coding & XR:** Unity, Unreal Engine, Mixed/Virtual Reality Frameworks, C#, C++, Python
- **Digital & Physical Arts:** Procedural 3D & VFX (Houdini, Blender), Digital Media & Video Art (Adobe Photoshop, Premiere Pro), Shader Graph, Oil Painting
- **Interactive Systems & Critical Data:** Human-Computer Interaction (HCI), LLM Integration, Computer Vision, AI Pipelines, Performance Profiling

SELECTED INTERACTIVE & RESEARCH PROJECTS

VirtuArt (Master's Thesis | VR Conceptual Art): Engineered a conceptual VR prototype designed to simulate the physical constraints, friction, and tactile resistance of traditional painting within a minimalist virtual canvas. The project explores the translation of physical artistic expression and bodily senses into immersive digital environments.

ReWild (MR/XR): Engineered C++ and Blueprint gameplay loops for a Mixed Reality ecosystem to be showcased at Ars Electronica.

LongDrive (Unity): Co-developed a semi-autonomous driving simulator with Environment Design, interactive UI, C# scripting, and AI traffic integration.

WORK EXPERIENCE

Student Tutor | Hagenberg Campus – FH Upper Austria | March 2025 – Now

- Mentored students in Mixed Reality frameworks, Object-Oriented Programming, and Games with a Purpose
- Translated complex technological concepts into accessible frameworks, guiding students through creative problem-solving and technical debugging

Creative Technologist (Python / C#) | Embedded Systems Laboratory – Softwarepark | May 2024 – June 2025

- Developed robust research-oriented code in iterative cycles, focusing on interactive systems and interactive feature implementation within a transdisciplinary lab environment
- Collaborated closely with researchers to bridge technical limitations with innovative software solutions

AI Researcher | Mapno Company – Cafedeeep | Khabarchain | 2020 – 2023

- Engineered Python-based AI pipelines and tools, facilitating advanced research and practical applications
- Processed complex datasets and integrated modern media design to build intelligent, interactive visual content and motion graphics

Junior Researcher of IoT & Physical Computing | BualiSina Incubator Center | 2017 – 2018

- Conducted transdisciplinary research on Internet of Things (IoT) devices, exploring the integration of physical sensors and smart environments
- Served as a technical assistant, mentoring students and facilitating physical computing projects

EDUCATION

Master of Interactive Media | FH Upper Austria, Hagenberg | 2023 – June 2026 | Focus: XR Technologies, Mixed Reality, Human-Computer Interaction

Bachelor of Computer Engineering | Hamedan University of Technology | 2016 – 2021

PUBLICATIONS & RESEARCH

Garousian, A. (2022). "The Positive Effects of Injecting History and Cultures into Video Games." (Focus on cultural representation in interactive media), Hamedan University of Technology (Pr.)

HONORS & AWARDS

- **Province-Selected Participant, Kharazmi Competition, Young Modern artists (2015)**
- **1st Place, Bayaan National Programming Competition (2014)**
- **1st Place, National Computer Olympiad (2012) & Province-Selected Participant (2015)**
- **Alumni of the National Organization for Development of Exceptional Talents (NODET)**

VOLUNTEER & SOCIAL ENGAGEMENT

- **Technical Mentor:** Taught Unity and XR development to university students pro bono (2019-2021).
- **Social Worker:** Provided educational support for orphan children and contributed to Mahak Charity for children with cancer (2012-2020).

ADDITIONAL ARTISTIC PRACTICES

- **Narrative Design:** National-selected story writer, exploring storytelling in interactive media.
- **Sound & Music:** Professional electric guitar player, with a keen interest in Sound Art and auditory feedback in interactive installations.
